Aniline
CAS No. 62-53-3

Aniline is an organic compound with a phenyl group attached to an amino group. It is widely used in the manufacturing of precursors to polyurethane along with many other industrial chemicals. It exhibits the odor of rotten fish.

Extreme caution must be taken when handling aniline due to the hazardous characteristics. Please refer to safety data sheet for additional information.

Aniline is available as a liquid in bulk or drum quantities.

PHYSICAL PROPERTIES

Molecular Weight	93.13
Density (g/mL)	1.02
Boiling Point (deg C)	184
Flash Point (deg C)	76
Solubility (g/100mL, 20 deg C)	3.6

SPECIFICATIONS

Purity (wt%, minimum),	99.9%
APHA Color (maximum)	100

SHIPPING DATA *(subject to change)*

Containers and Net Contents	
Tanker Trucks	to your requirements
Drums	to your requirements

STORAGE AND HANDLING

Aniline will begin to darken within 30 days if exposed to air, light or moisture.
